Understanding Keyboard Major and Minor Chords

What Are Chords?

Chords are groups of notes played simultaneously that form the harmonic foundation of music. On the keyboard, chords are built by stacking specific intervals (distances between notes), primarily thirds, to create a harmonious sound. The most common chords in Western music are major and minor chords, which serve as the building blocks for countless songs and musical styles.

Major vs. Minor Chords

- Major chords have a bright, happy sound. They are constructed using a root note, a major third,

and a perfect fifth.

- Minor chords have a sadder or more somber tone. They are built with a root note, a minor third, and a perfect fifth.

Understanding the difference in construction is key to mastering keyboard chords.

How to Play Major and Minor Chords on the Keyboard

Basic Formula for Chord Construction

- Major chord: Root + Major Third (4 semitones above root) + Perfect Fifth (7 semitones above root)

- Minor chord: Root + Minor Third (3 semitones above root) + Perfect Fifth (7 semitones above root)

Playing Chords: Step-by-Step

- Identify the root note: This is the starting point of the chord.
- Build the third: Count the semitones from the root to find the third (major or minor).
- Add the fifth: Count up to the perfect fifth.
- Play all notes simultaneously: Use fingers to press all three keys at once.

Common Inversions and Voicings

- Root position: Root note at the bottom.
- First inversion: The third is at the bottom.
- Second inversion: The fifth is at the bottom.

Inversions are useful for smooth chord progressions and varied voicings.
