Understanding the SOAP Note Structure in Physical Therapy

Subjective (S)

The subjective section captures the patient's reported symptoms, medical history, and personal concerns. It provides context and sets the foundation for the clinical assessment.

Objective (O)

This section includes measurable data obtained through physical examination, tests, and observations. It documents findings such as range of motion (ROM), strength, gait analysis, and other relevant assessments.

Assessment (A)

The assessment synthesizes subjective and objective data, offering a professional interpretation of the patient's condition, progress, and response to treatment.

Plan (P)

The plan outlines therapeutic interventions, goals, patient education, and future steps, guiding ongoing care and ensuring continuity.
