- Recording various types of transactions
- Preparing journal entries
- Posting to ledger accounts
- Preparing financial statements such as the income statement, balance sheet, and cash flow statement

Such problems are designed to test a student's ability to apply theoretical knowledge practically, ensuring a holistic understanding of the accounting cycle.

A trial balance ensures that total debits equal total credits, serving as a preliminary check for accuracy before preparing financial statements.

4. Financial Statements Creation

Using the ledger balances, students prepare:

- Income statement (profit and loss statement)
- Balance sheet (statement of financial position)
- Cash flow statement (if required)

5. Analysis and Interpretation

Finally, the problem may require analyzing financial ratios, liquidity, solvency, and profitability to evaluate the company's financial health.
