Deep Dive into Key Topics and Their Conceptual Questions

Mechanics

- Newton's Laws:
 - Question: "If two objects are pushed with the same force but have different masses, which accelerates more?"
 - Answer: The object with less mass experiences a greater acceleration, illustrating $F=ma$.
- Conservation of Energy:
 - Question: "Can an object gain kinetic energy without an external force doing work?"
 - Answer: Only if it is gaining potential energy that converts into kinetic energy; otherwise, no.
- Projectile Motion:
 - Question: "Does air resistance affect the horizontal range of a projectile?"
 - Answer: Yes, it reduces the range; neglecting air resistance can lead to inaccurate predictions.

Electromagnetism

- Electric Fields and Forces:
 - Question: "What happens to the electric force if the distance between charges doubles?"
 - Answer: The force decreases by a factor of four, following Coulomb's law.
- Magnetic Fields and Motion:

- Question: "Why do charged particles spiral in magnetic fields?"
- Answer: Because magnetic forces are perpendicular to velocity, causing circular motion.
- Electromagnetic Induction:
- Question: "Does changing magnetic flux induce a current in a stationary coil?"
- Answer: Yes, if the magnetic flux through the coil changes over time.

Thermodynamics

- Laws of Thermodynamics:
- Question: "Can heat flow spontaneously from a colder to a hotter body?"
- Answer: Not spontaneously; it violates the second law of thermodynamics.
- Heat Engines:
- Question: "Is it possible to convert all heat energy into work?"
- Answer: No, due to the second law, some energy is always lost as waste heat.
