Customizing macOS Mojave: Fantastic Tricks and Tweaks to Elevate Your Experience

macOS Mojave, released by Apple in September 2018, marked a significant milestone in the evolution of the Mac operating system. With its sleek interface, powerful features, and focus on user privacy, Mojave quickly became a favorite among Mac enthusiasts. However, to truly harness its potential and tailor the system to your preferences, customization is key. From simple tweaks to advanced modifications, there are numerous ways to enhance your macOS Mojave experience. In this comprehensive guide, we'll explore some of the most effective tricks and tweaks, providing detailed explanations and insights into each.

Understanding the Foundations of macOS Mojave Customization

Before diving into specific tricks and tweaks, it's essential to understand the core principles behind customizing macOS Mojave. Apple maintains a closed ecosystem, emphasizing security and stability, which can sometimes limit direct modifications. Nevertheless, with the right tools and knowledge, users can personalize their Macs significantly.

Key points include:

- System Integrity Protection (SIP): A security feature that restricts modifications to core system files. Disabling SIP allows deeper tweaks but increases security risks.
- Third-party tools: Applications like Tweak tools, Terminal commands, and launcher utilities enable customization beyond default settings.
- Backup importance: Always back up your system before making significant changes to prevent data loss or system instability.

Simple Customizations: Enhancing Visuals and Usability

For most users, initial customization involves visual and usability tweaks that don't require advanced technical knowledge.

Customizing the Desktop and Finder

- Dynamic Desktop Wallpapers: Mojave introduced dynamic wallpapers that change based on the time of day. To set this:
 - Go to System Preferences > Desktop & Screen Saver.
 - Select the "Dynamic Desktop" folder.
 - Choose a wallpaper like "Aqua" or "Mojave."
- Folder Icons and Labels: Personalize folder icons using images or custom designs:
 - Right-click a folder, select "Get Info."
 - Drag an image onto the folder's icon in the Info window.
 - Use apps like Image2Icon for more advanced icon creation.

Customizing the Dock and Menu Bar

- Adjust Dock Size and Position: System Preferences > Dock & Menu Bar.
- Add or Remove Dock Items: Drag apps in or out of the Dock.
- Hide or Show the Menu Bar: Use System Preferences > Dock & Menu Bar to customize appearance and behavior.

Using Dark Mode and Night Shift

- Enable Dark Mode: System Preferences > General > Appearance > Dark.
- Schedule Night Shift: System Preferences > Displays > Night Shift, set timings for comfortable viewing.

Advanced Tweaks: Unlocking Hidden Features and System Modifications

For users comfortable with more technical adjustments, Mojave offers a range of hidden features and tweaks.

Enabling the Hidden Dark Mode for Apps

While Mojave introduced system-wide Dark Mode, some apps may not support it fully. You can force dark mode for specific apps using command-line tweaks or third-party tools like "NightOwl," which allows toggling dark mode independently of system settings.

Customizing the Toolbar and Finder Features

- Adding New Toolbar Items: Use Finder's "Customize Toolbar" to add useful buttons such as "Path Bar" or "Sidebar."
- Show Hidden Files: Press Command + Shift + Period in Finder to toggle visibility of hidden files (those starting with a dot).

Using Terminal for Power User Tweaks

Terminal commands can unlock additional customization options:

- Disable Gatekeeper: To run unsigned apps:

```
---
```

```
sudo spctl --master-disable
```

```
---
```

Note: This reduces security; enable it back with:

```
---
```

```
sudo spctl --master-enable
```

```
```
```

- Change Screenshot Format: Default is PNG; to change to JPG:

```
```
```

```
defaults write com.apple.screencapture type jpg; killall SystemUIServer
```

```
```
```
