Over the past two decades, Century 21 has established itself as a leading publisher and educational resource provider, particularly in the Philippines, where its materials are widely adopted across secondary and tertiary institutions. The Accounting 12 Mastery Problem Century 21 specifically targets senior high school students enrolled in accounting courses, aligning with the K-12 curriculum reform that emphasizes competency-based learning.

The integration of mastery problems into the curriculum reflects a shift towards mastery learning—an educational approach that encourages students to achieve a high level of understanding before progressing. The Accounting 12 Mastery Problem Century 21 is designed to serve as both a diagnostic tool and a reinforcement activity, aiming to ensure students attain proficiency in core accounting procedures.

Origins and Development of the Mastery Problem Series

Historical Context and Educational Philosophy

The development of the Accounting 12 Mastery Problem Century 21 is rooted in the broader pedagogical philosophy of mastery learning, initially popularized by educational psychologist Benjamin Bloom in the 1960s. The premise is simple: students should master a topic before moving on, reducing gaps in understanding that often hinder overall academic success.

Century 21's mastery problem series was crafted to align with the Philippine Department of Education's (DepEd) K-12 senior high school curriculum, which emphasizes competency-based education (CBE). The resource aims to support this by providing structured, incremental problem sets that progressively build student competence.

Content Design and Structure

The Mastery Problems are typically organized into thematic units covering key accounting topics such as:

- Journal Entries and Ledger Posting

This alignment ensures that the mastery problems serve as effective formative assessments, guiding both students and teachers toward targeted learning objectives.

Evaluating Effectiveness: Student Performance and Feedback
