- Screening for postpartum depression and providing mental health support.
- Contraceptive counseling and family planning.
- Management of chronic conditions that may have been unaddressed during pregnancy.
- Assessment of breastfeeding support and counseling.

Specific Screening and Prevention Recommendations

ACOG emphasizes several preventive measures and screenings to enhance perinatal outcomes.

Genetic Screening and Counseling

- Carrier screening for conditions like cystic fibrosis, Tay-Sachs disease, and sickle cell anemia, especially in populations at risk.
- Discussing options for diagnostic testing, such as chorionic villus sampling or amniocentesis, based on screening results and maternal age.

Vaccinations

- Influenza vaccination during pregnancy to prevent maternal and fetal complications.
- Tdap vaccination between 27 and 36 weeks gestation to protect neonates from pertussis.
- Updating other routine immunizations as indicated.

Screening for Mental Health

- Routine depression screening during pregnancy and postpartum.
- Providing resources and referrals for mental health support when necessary.

Updates and Emerging Areas in Perinatal Guidelines

ACOG continually revises its guidelines to incorporate new evidence and address emerging issues:

- **COVID-19 Considerations:** Recommendations include vaccination, infection control measures, and management of pregnant women with COVID-19.
- **Implementing Telehealth:** Expanding prenatal and postpartum care via telemedicine to improve access and adherence.
